SCREAMER!!

GAMMA RAY

SECRET WEAPON

SCREAMER!!

Ultra long range driver

Our most stable driver, we expect this disc to fly farther than any other disc on the market. Perfect for those extra long holes where distance off the tee is a must and great for helping any player throw farther, this disc should level the field a bit. Expect to see **SCREAMER** crushing down the fairways real soon!

GAMMA RAY *Straight flyer*

Holding its line as you throw yet remaining stable at the end of the flight path, this disc is perfect for keeping you on the fairways where it's essential that you stay out of trouble. All players should have a **GAMMA RAY** in their bag!

SECRET WEAPON *Understable driver*

Perfect for those left to right shots and carving your way through the woods, give an understable disc some hyzer and watch it come up straight. We believe the biggest mistake new players make is throwing too many stable discs. Learning how to throw a disc correctly is crucial to the long term success of any new disc golfer. The **SECRET WEAPON** is a must for the beginning golfer.

The Mission *Mid-range*

This will be one of the most important discs in your bag--perfect for mid-range shots and longer-approach shots. Everyone looking to improve their game must be on a mission to leave themselves with the shortest putts possible. Keep several **MISSIONS** in your bag, from a new or stable **MISSION** to a worn or understable **MISSION**.

MONEY *Putter*

The only way to make money on the tour, or take it from your friends, is to have a quality putting disc. No other disc will take as many strokes off your game as the **MONEY**. Get a stack of these precious discs and practice your putting often. **MONEY** is also great for approach shots.
